

AkyPak® Classic

Corrugated Sleeve
1200x800

Efficient and affordable

This hybrid container, featuring a thermoformed plastic base and lid and a triple wall corrugated cardboard sleeve, is an efficient and affordable solution to help you save space, time and money while safely storing and transporting your goods.

This solution is especially suitable for industries with high traffic of goods and product rotations, as well as for long-term storage needs, seasonal goods and product returns.

Plastic shrouds are used as reinforcement, extending the lifespan of the corrugated sleeve. When the sleeve eventually wears out it can be easily and economically be replaced by a new one, whereas the pallet base and lid will stay in your supply chain for 10 or more years.

Good Weight to Strength Ratio

Shock Resistant

High stacking properties

Suitable for returns

Ideal for seasonal items

100% Recyclable

Technical Specifications

External Dimensions (mm)	1200x800x800 ¹
Internal Dimensions (mm)	1130x720x586
Weight of the Sleeve (kg)	4,8kg
Weight of Pallet (kg)	7,4kg
Weight of the Lid (kg)	5,5kg
Box Volume (L)	470 Litres
Material	HDPE / Cardboard
Sleeve Quality	1750g/m ²

¹Other heights available on request.

Sustainability at the core

Designed and manufactured according to Circular Economy principles our extensive range of AkyPak Containers are a key element to reduce dependency on single-use packaging materials and to curb CO₂ emissions from supply chains. They are fully recyclable at the end of their useful life, producing zero waste.
