

**AkyPak<sup>®</sup> Store**  
Storage Solutions  
by Corplex

# AkyPak® Store - Retail Solutions

Sustainable & Reusable solutions for any step of your supply cycle

## WHAT are The Benefits of Polypropylene

### Hard-wearing

Lightweight and robust, our products are impact-resistant and show no wear and tear signs despite heavy use

### Water Resistant

Suitable for indoor and outdoor use, our products protect your dry of semi-wet goods, preventing the formation of mold.

### Fiber-free and Hygienic

Non-shedding, our products minimize allergic reactions such as dermatitis, irritation of the eyes, nose and throat. Their smooth surface can be wiped, cleaned and washed to eliminate dust.

### Tailored Solutions

Our solutions are designed and manufactured from A to Z to suit your needs at any step of your supply chain.

# Racking Units, Boxes & Pick Bins

## AkyPak® Store Modular Storage Pick Bins

Custom picking bins increase efficiency and result in shorter order fulfillment lead times.

Whether you choose shelf standing (to fit on existing racks) or free standing (to maximize floor space), our expert design team will cater to specific size requirements to improve the efficiency of your order picking, creating the perfect picking wall.

AkyPak® stackable picking bins are made of strong, twin walled polypropylene to ensure longer lifespan and re-usability, leading to lower lifetime costs.

## AkyPak® Store Racking Unit

Our expert design team will work with you to understand your needs and propose the most efficient storage solutions to help you maximize space, increase product visibility and ease of picking, and lower your costs.

## AkyPak® Boxes & Totes

Re-usable and durable Boxes and Totes customized to the transport needs of different product categories. Sturdy, yet lightweight and collapsible when not in use, our products will be manufactured to the exact sizes you require.

WHY  
**AkyPak®**  
 Picking Bins  
 are the  
**better choice**

- ✔ Low initial cost
- ✔ Lightweight
- ✔ Easy to handle
- ✔ Flatpack for delivery & storage
- ✘ Moisture susceptible
- ✘ Short lifespan (18 mths)
- ✘ Cannot be cleaned
- ✘ Particle shedding (allergen)

- ✔ Medium initial cost
- ✔ Lightweight
- ✔ Easy to handle
- ✔ Flatpack for delivery & storage
- ✔ Moisture resistant
- ✔ Long lifespan (+10 yrs)
- ✔ Ease of cleaning
- ✔ Non-shedding

- ✘ Higher initial cost
- ✔ Heavy duty applications
- ✔ Moisture resistant
- ✔ Ease of cleaning
- ✔ High durability (+10 yrs)
- ✔ Non-shedding
- ✘ No flatpack when not in use
- ✘ Limited sizes
- ✘ Expensive custom sizes

# 5 Reasons to choose AkyPak® Store

## About us...

Corplex has more than 50 years of expertise in plastics extrusion and partnership with key account customers in multiple markets.

We operate out of six sales and manufacturing facilities strategically located in France, the United Kingdom, Spain and Slovakia.

Our mission is to work closely with our customers to introduce efficient solutions to reduce the impact of their business on the environment.

## 1. Lower warehouse costs

With products as durable as ours (+20 years!) that pay for themselves in under 3 years, your warehouse operating costs will be lower versus comparable options in other materials.

## 2. Optimise process efficiency

Our products can be installed quickly to answer a peak of activity, or collapsed and stocked when not in use for maximum space optimisation. You can also improve picking time by creating a colour-coding scheme to make it easier for your staff to locate and pick items they need.

## 3. Ensure goods protection

AkyPak® bins are made of strong, twin walled polypropylene with high shock and impact resistance. Moisture, rust and mold proof they are the ideal material for all seasons storage conditions.

## 4. Protect workers' health and safety

Our products are lightweight, ease to handle and ergonomic. They also minimize allergic reactions to dust and fiber-based particles from shedding cardboard. Your warehouse staff will love a solution that protects their health and that allows them to locate items faster and more efficiently!

## 5. Commit to Sustainability

Our products meet the 3 principles of the Circular Economy: Reduce, Re-use and Recycle. Reduce because they can be made to your exact size, thus no need to select the «next size up». Re-use because with a life span of +20 years there is no need to replace. Recycle because they are 100% recyclable into new products at the end of their useful life.
